

## ARE MOSQUITOES BUGGING YOU?

**Azusa, Ca.—June 24, 2020**--It's not just the buzzing in your ear. Mosquitoes really are bugging more people in Azusa this year than in previous years. The stagnant water sources in our yards and patios are fueling a potentially busy year for mosquitoes. There are simple things everyone must do now to prevent mosquitoes from taking over our neighborhoods:

1. TIP stagnant water weekly from all containers
2. TOSS out any unused containers that can collect stagnant water
3. PROTECT yourself with repellent to stop mosquito bites

Public health officials recommend using mosquito repellents containing any ONE of the following ingredients: DEET, oil of lemon eucalyptus, Picaridin or IR3535. For more information, visit [www.TipTossProtect.org](http://www.TipTossProtect.org).

Are you and your neighbors tired of mosquitoes and their bites? Bite Back! Band together you're your neighbors to make your neighborhood more bite-free. Sign up for a quick 30-minute orientation at [www.BiteBackChampion.org](http://www.BiteBackChampion.org) or call [626-814-9466](tel:626-814-9466).

Notice any unmaintained swimming pools? Submit a tip to mosquito control at [www.sgvmosquito.org](http://www.sgvmosquito.org) or [626-814-9466](tel:626-814-9466).
